

Helios & Friends

Helios is a small star from a distant part of the universe who has come to the town of Sunshine to learn all about our planet. With the help of his galactic friends, and the smart humans of Sunshine, Helios embarks on a journey of discovery through science, technology, engineering, the arts, English language learning, and cool future ready skills.

Helios

A tiny star from a distant galaxy, Helios is forever curious about people and things on earth. A little yellow fuzzy ball of excitement, he loves to learn new things and is known to be a little jokester sometimes.

Yara

A tiny blue planet, Yara is naturally fascinated by all living things. She loves to spend time in nature and leaps on every opportunity to learn about our planet, big or small, from ocean currents to insects.

Ort

A shooting star, Ort is Helios' pet companion, forever following and watching over Helios and making sure he's safe and happy while also learning some things along the way.

The humans of Sunshine are all more than happy to help Helios and his space friends learn all about life here, and what it means to be human :)

Helios and his friends are always eager to learn, and they learn a lot, because every episode pertains to an educational subject and involves learning points from an accredited curriculum standard.

Helios
is a newcomer to our world,
ready to learn and explore and be
inspired by the people and places around him,
just as a child is.

Stephen Phillips
Executive Producer

A creative producer from Los Angeles USA with extensive experience working in the entertainment industry for clients such as HBO, Appian Way, and Patagonia. A Children's Media Association member, Stephen has executive produced over 100 episodes of kids entertainment content.

Behind every episode is a team of educators and experts from a NASA engineer to a Junior Masterchef!
